Maximiliano Viquez

Senior Full Stack Engineer

Montevideo, Uruguay | +598 95 456 888 | viquezmaximiliano@gmail.com | linkedin.com/in/maximilianoviquez | maximilianoviquez.github.io/Portfolio

Professional Summary

Senior Full Stack Engineer with 5+ years taking products to production with Node.js, TypeScript, React and AWS. Built matchmaking and routing engines, and a cloud migration that cut infrastructure costs by roughly 70%.

Professional Experience

Senior Full Stack Engineer — Pinealage (Freelance)
Jan 2026 – Present

- Built, as primary engineer, a social group-meetup app on iOS and Android with 3,700+ users, on four NestJS microservices, React Native and a React admin console.
- Cut infrastructure costs by roughly 70% by migrating the platform from GCP to AWS (EC2, RDS, Secrets Manager), with CI/CD on GitHub Actions and observability with OpenTelemetry and Grafana.
- Designed a matchmaking engine that forms groups by location, availability and time zone (BullMQ, PostgreSQL, MongoDB geospatial).
- Implemented in-app subscriptions with server-side receipt validation, App Store and Google Play webhooks and automated reconciliation.

Full Stack Engineer — SoyDelivery
Apr 2025 – Sep 2026

- Reduced route planning from hours to seconds with an in-house optimization engine processing thousands of orders per day.
- Built an in-house geocoding service and a self-hosted, provider-agnostic routing layer (OSRM with Mapbox failover).
- Automated hundreds of daily SMS and voice support conversations with an LLM-based service (Twilio) that escalates only complex cases to agents.
- Built the delivery-management platform with real-time tracking, client API integrations and synchronization with a legacy GeneXus financial system.

Full Stack Engineer — Independent Consultant (Freelance)
Jan 2024 – Apr 2025

- Built custom management and booking systems for small businesses in food service and personal services.

Software Developer — IBERTRANS SRL
Mar 2020 – Dec 2023

- Replaced spreadsheet-based management with an in-house platform (C#/.NET, SQL Server) for fleet, drivers, trips, fuel and maintenance, with on-demand reporting for ~130 deliveries per month.

Projects

Co-founder & Technical Lead — ConViven (Own venture)
Mar 2024 – Present

- Took a roommate-matching platform from MVP to production release with a team of 4 (React Native, React, Node.js).

Technical Skills

Backend: Node.js, NestJS, Express, REST, WebSockets, Socket.IO, JWT, OAuth 2.0, BullMQ, RabbitMQ
Databases: PostgreSQL, Prisma, MongoDB, Redis, SQL Server
Frontend & Mobile: React, Next.js, React Native, Expo, Redux Toolkit, Tailwind CSS
Cloud & DevOps: AWS (EC2, RDS, S3, Lambda, Secrets Manager), GCP, Docker, Nginx, Cloudflare, GitHub Actions
Testing & Observability: Jest, Supertest, Testcontainers, OpenTelemetry, Grafana, Sentry
AI: LLM integration, Claude Code, GitHub Copilot, Cursor

Education

Analyst in Information Technology — Universidad ORT Uruguay, 2026

Languages

Spanish: native | English: upper intermediate (B2), ESL course at Camden County College, USA
